PROFESSIONAL SUMMARY

Computer Science Engineering student specializing in Artificial Intelligence, Machine Learning, and Data Analytics, with hands-on experience building AI and data-driven applications through academic projects and hackathons. Skilled in Python, machine learning, and Power BI, with a strong foundation in problem-solving, data analysis, and software development. Currently pursuing a Bachelor of Engineering with an 8.5 CGPA, seeking opportunities in AI/ML, Data Analytics, or Software Development roles.

EDUCATION

Bachelor of Engineering – Computer Science Engineering

Vidya Vikas Institute of Engineering and Technology | Expected Graduation: 2027

Currently in 6th Semester | CGPA: 8.5

EXPERIENCE

Microsoft Power BI Virtual Internship (Online)

- Completed a virtual internship focused on dashboard creation and data visualization using Power BI.
- Developed interactive reports and dashboards to support business analytics use cases.
- Applied data cleaning techniques and core business analytics concepts to real-world datasets.

PROJECTS

SkySense AI – Pest Outbreak Prediction System

Tech Stack: Python, Machine Learning, Data Analysis

- Developed an AI-based crop pest prediction system leveraging weather and environmental data.
- Enabled early detection and preventive agricultural decision-making through predictive modeling.

AI-Powered Health Monitoring System

Tech Stack: Python, Data Processing

- Built a healthcare monitoring system to analyze health data and predict risk levels.
- Processed and analyzed health datasets to generate actionable insights.

Honeypot API – Cybersecurity Monitoring System

Tech Stack: Python, API Development, Cybersecurity

- Developed a Honeypot API to detect and monitor suspicious network activity.
- Implemented core cybersecurity and API monitoring concepts to strengthen threat visibility.

Healthy Food Recommendation System

Tech Stack: Python, Recommendation System

- Developed a recommendation engine to deliver personalized food suggestions.
- Generated recommendations based on user preferences and nutritional factors.

SKILLS

Technical Skills: Python, HTML, CSS, Bootstrap, MySQL, Power BI, Machine Learning, DBMS

Tools: GitHub, VS Code, Firebase

Soft Skills: Communication, Teamwork, Problem Solving, Time Management

CERTIFICATIONS

- Microsoft Power BI Virtual Internship – Dashboard creation, data visualization, and business analytics
- Google Cloud Gen AI Academy 1.0 – Completed Generative AI codelabs; earned Codelab Completion Certificate

ACHIEVEMENTS & ACTIVITIES

- Participated in 5+ hackathons, including national-level events
- Completed multiple virtual internship and certification programs
